**Art Unit: 3711** 

# **DETAILED ACTION**

In response to the reply submitted December 10, 2003, the amendment will be entered-in-part wherein only the claim will be entered. The amendment made to the specification will not be entered as it is not commensurate with drawings thus raising confusion. (See MPEP 714.03)

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the applicant recites "the wholly encapsulated inner core shell housing said components". Is the applicant try to say that there is a housing that encases the inner core other than the outer shell or should the inner core housing be simply the outer shell. Clarity needed, therefore, claim 1 has been rejected. For examination purposes, the above will be interpreted as being the outer shell.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/927,035

**Art Unit: 3711** 

1. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newcomb et al. (USPN 4695055).

Newcomb et al. discloses an illuminated translucent golf ball for visibility when playing golf in the dark (See Abstract). The ball comprises a hole, or an inner core (6), which is bored through to the other side of the ball, for receiving a light stick (8) (See Figures 1, 2, and 4). The light stick (8) comprises a vial (10) carrying a chemical (12) within another chemical (14) (See Figure 3 and Column 4, lines 12 through 19). When the vial (10) is broken, the chemicals mix illuminating the stick (8) (See Column 4, lines 12 through 19). The light stick (8) is preferred being broken manually (See Column 4, lines 12 through 19). The vial (10) is considered to be a partition element merely because it separates the two chemicals until it is broken. The outer membrane of the light stick is inherently a inner core shell housing because Newcomb et al. also discloses dimple on the outer surface of the golf ball (See Figures 1, 2, 5, 6; Column 5, lines 17 through 68; and Column 6, lines 1 through 21). Applicant does not disclose why it is critical for the inner core shell to be spherical in order to attain the invention. One having ordinary skill in the art would have sought such to be an obvious matter of design choice. The inner core of Newcomb et al. would perform equally as well because it hold the two chemi-luminescent components.

### Response to Arguments

Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Application/Control Number: 09/927,035

Art Unit: 3711

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin A. Hunter whose telephone number is 703-306-5693. The examiner can normally be reached on Monday through Friday from 7:30AM to 4:00PM Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Vidovich, can be reached on 703-308-1513. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for Art Unit: 3711

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
